

Newsletter 11

The Dams Newsletter

New possibilities for ICOLD

The new ICOLD has given dam owners the ability to manage their own data in a secure and efficient way. The new system will allow dam owners to share their data with other dam owners, and to access the information they need to manage their dams more effectively. The new system will also allow dam owners to share their data with other dam owners, and to access the information they need to manage their dams more effectively.
