

20th Anniversary of SLOCOLD, International Symposium, 16th October 2013, Ljubljana (Slovenia)

Dam engineering in Southeast and Middle Europe

Recent experience and future outlooks

Plaza Hotel, Ljubljana, 16th October 2013

With the following topics:

A. Performance of existing dams

1. Successful stories and good practice
2. Dams for other purposes than hydropower
3. Multipurpose reservoirs
4. Safety – reassessment of existing dams
5. Lessons learned from the past

B. Materials and technologies

1. Dam design and analysis
2. Modern approaches to dam safety
3. Adaptation of dams to environmental constraints
4. Dam monitoring

C. Recent project development and future outlooks

1. Utilization of hydro potential
2. Dams and climate changes
3. Cross-border issues related to dams

The aim of the meeting is to gather dam experts from a wider region, to upgrade their technical knowledge, communication, and mutual understanding. An especially warm invitation is directed towards Slovenian professionals of all profiles who want to get a better insight into dam engineering practice of Slovenia and of some other EU countries. 20 papers have been received so far and the following keynote lectures have been confirmed:

Official language of the Symposium will be English. The Symposium will be held on Wednesday, 16th October 2013 in Plaza Hotel Ljubljana, which is a modern 4-star arrangement at the outskirts of Ljubljana, adjacent to the shopping and leisure district of BTC City of Ljubljana.
