ICOLD ON THE FRONT LINE FOR DEVELOPMENT

Achieving the 2015 millennium goals is the greatest challenge the world has ever faced. The Millennium Development Goals (MDGs) set the agenda for the 21st century. The world must meet the challenge of eradicating poverty, ensuring that all have access to drinking water and food, and that all have access to education. The world must also ensure that all have access to energy, and that all have access to information and communication technologies. The world must also ensure that all have access to a clean environment.

The world must also ensure that all have access to a clean environment. The world must also ensure that all have access to a clean environment. The world must also ensure that all have access to a clean environment.

The world must also ensure that all have access to a clean environment. The world must also ensure that all have access to a clean environment. The world must also ensure that all have access to a clean environment.
